

Polar Code

Survival Training Course

2-day course on how to survive in arctic temperatures as cold as -30 °C up to 5 days after evacuation. The course meets the minimum requirements for survival training in arctic conditions after a possible ship evacuation set by the Polar Code regulations.

Upon completing this training, the participant will:

- ✓ be familiar with proper procedures on what to do after evacuation
- ✓ know-how to survive in arctic temperatures as cold as -30 °C up to 5 days after evacuation
- ✓ understand and know how to manage difficult physical and mental conditions
- ✓ be able to lead evacuation operations and also take care of passengers and crew onboard the ship

The course is held outdoors
in wintertime.
Location: Kittilä, northern Finland
